

SIRI BENCH 4 - NOVELTY -

Equipment for large formats

PATENT

The modular work benches SIRI BENCH 3 have aluminium drawn and cross pieces to guarantee lightness and stability. They come with plastic guards for the drawn parts (top of the work bench), with a feet system of adaptation to the ground and height adjustment. Thanks to the available junctions, the SIRI BENCH 3 can be easily connected together to be adapted to the dimensions of the slabs to cut. The Siri work benches are delivered with foldable legs to facilitate transport and with a pair of hooks for storing the guide (A).
